

Asset / Process	Threat Scenario	Likelihood (1-5)	Impact (1-5)	Risk Score	Mitigation Control
Customer Personal Data (PII)	Employees paste sensitive customer data and private emails into public, free-tier GenAI tools, causing regulatory and compliance exposure.	4	5	20	Establish strict identity-based Access Control. Require Multi-Factor Authentication (MFA) for the code repository and perform endpoint scans to remove unauthorized plugins.
Corporate Source Code	Developers use unapproved third-party AI extensions, unintentionally leaking proprietary software code to public AI training models.	3	5	15	Establish strict identity-based Access Controls. Require Multi-Factor Authentication (MFA) for code repositories and perform system audits.
